DEFINITION OF TERMS: (Data Source: U.S. Fish and Wildlife Service, as of May 2015)

The Number of Endangered and Threatened Species includes species classified as Endangered, Threatened and Threatened due to Similarity of Appearance. **Endangered:** Species in danger of extinction throughout all or a significant portion of its range. **Threatened:** Species likely to become endangered within the foreseeable future throughout all or a significant portion of its range. NACo analysis considered experimental non-essential populations of endangered species as "threatened", because FWS treats them as threatened species on public land. **Threatened due to Similarity of Appearance:** Species not biologically endangered or threatened, but considered "threatened" due to similarity of appearance with another species with "threatened" status.
